

# Job Title: Software Development Engineer 1 (SDE 1)

*Location: Whitefield, Bangalore, India (No remote work option)*

## Company Overview:

Betafront Technologies Private Limited is a dynamic startup in the finance domain, committed to delivering innovative solutions using cutting-edge technology. We're looking for a highly motivated Software Development Engineer 1 to join our team of talented engineers in Bangalore. If you're passionate about solving complex technical challenges and thrive in a fast-paced startup environment, we want to hear from you.

## Position Overview:

We are looking for a highly motivated Full Stack Developer (Fresher or up to 1 year experience) to join our team. The candidate will primarily be responsible for maintaining and building new features on our existing web platform, developed using NestJS (Node.js) on the backend and Next.js (React) on the frontend.

## Responsibilities:

- Convert technical design specifications into high-quality, maintainable code.
- Write comprehensive unit tests to ensure code quality and reliability.
- Articulate realistic timelines for project delivery and adhere to deadlines.
- Collaborate effectively with a team of highly motivated engineers to tackle technical challenges and drive project success.
- Continuously learn and stay updated on new technologies and industry best practices.

## Qualifications:

- 0 to 1 year of hands-on experience with Node.js (NestJS) and React (Next.js).
- Bachelor's degree in Computer Science or Information Technology.
- Proficiency in React is required.
- Strong understanding of JavaScript/TypeScript fundamentals.
- Familiarity with REST APIs, version control (Git), and basic database knowledge (SQL or NoSQL).
- Experience working in the finance domain is a plus.
- Familiarity with Agile methodologies.
- Comfortable with working on Linux systems
- Excellent problem-solving and communication skills.
- A strong sense of ownership and attention to detail.

## Performance Metrics:

- Time taken to deliver projects.
- Code coverage and code quality metrics.
- Proactive involvement in initiatives and projects.
- Team collaboration and contribution.

## Benefits:

- Competitive salary and benefits package.
- Opportunities for professional growth and advancement within the company.
- Dynamic and collaborative work environment.
- Exposure to cutting-edge technology stack and challenging technical projects.

## Expected Salary:

SDE1 (Full stack developer): 12-15 LPA
